

Minutes of Monthly Meeting Kinsella Municipal District

Minutes of meeting held at Kinsella, at 10 a.m. on July 13th, 1936.
Present: Crs. Bradley, Albrecth, Bawden, Overbo.

Cr. Albrecth that minutes be passed as read. C.U.

Statement of receipts and expenditures read. Cr. Albrecth that they be passed as read. C.U.

Mr. S. S. Graham, from the Dept. of Agriculture, spoke re the weed problems, stating that the Dept. wished the Council to place one weed inspector on whole time till the end of the month, to see if any of the following weeds are present in the M. D.: Hoary Cress, Russian Nap, Weed, Leafy Spurge and Tartarian Buckwheat.

Br. Bradley that Council hire one weed inspector for ten days to look for the above mentioned weeds. C.U.
Cr. Bawden that Mr. Waite be appointed. C.U.

Cr. J. Stronach having on account of ill health presented his resignation to the Council, Cr. Bawden that this resignation be accepted with regrets and hopes for Mr. Stronach's speedy recovery. C.U.

Cr. Bawden that secretary proceed with by-election for Div. 5, appointing July 25th for nomination day. R. Stevens for D.R.O. and Lee's hall as place for meeting. C.U.

Mr. J. Jackson and Mr. Stead spoke on behalf of the Alberta Protestant Home for children. Cr. Bawden that the two children of Mr. C. Lindquist be placed in the said home. C.U.

A bill for \$28 having been presented by Mr. T. Lien for conveying Wm. Onychuk to Edmonton, Cr. Overbo that secretary write Mr. Lien offering him \$12.50. C.U.

Mr. Ward and Mr. Whitford having applied for an increase in their pension, Cr. Albrecth that they be instructed to apply direct to the Pensions Board. C.U.

Mr. O. Lindquist having applied direct to the O. A. Pensions Board for the O. A. pension, Cr. Overbo that the Council recommend this pension providing that the requirements of the Act are fulfilled. C.U.

The secretary was instructed by the Council to have R. Holcroft returned to the District and to arrange for the transportation.

Mr. B. Selander having handed in his resignation as pound-keeper for Div. 2, Mr. Albrecth that the said resignation be accepted and that Mr. G. Albrecth be appointed in his stead, the pound to be located on S.E. 17-45-11-w. 4th. C.U.

Cr. Albrecth that District take title to the lots in Kinsella and Jarow and that secretary be instructed to sell said lots at a price that takes due consideration to the amount of taxes thereon. C.U.

A letter from Mr. C. Bauer, Lacombe having been read enclosing note re oats shipped to Sedgewick, Cr. Overbo that secretary write to Mr. Bauer informing him that owing to the Council having been able to re-

sell some of these oats, that Council consider the sum of \$75 be adequate compensation for the Dist. C. U.

The following correspondence was read and tabled for the action of Sec. R. A. Hospital, Viking Hospital, re accounts; Alta. Protestant Home, re Lindquist children; Dept. Mun. Affairs, re Holcroft, re work for Prosperity Bonds; University Hospital, re Onychuk.

Cr. Bradley that the following bills be passed for payment:

G.F. Albrecth, re Onychuk	G \$50.00
University Hosp., re "	G 24.55
University Hosp. re Meakins	G 71.58
Viking Hospital, re Meakins	G 90.00
J. Marshall, re Smutz	G 8.90
W. Ferries, Bereza 2 mos.	G 15.00
M. Koll, labor	G 13.50
F. L. Coe, labor	G 24.80
R. and W., repairs	1 2.25
R. and W., repairs	6 1.50
S. Witton, Murray 2 mos.	G 20.00
P.M. Hosp., Waseley	G 90.00
Expenses, Lindquist	G 6.00
F. & Johnson, Fuder	G 11.05
J. D. Adams, repairs	3 6.00
Dr. Haworth, E. Whitford	G 2.00
Andrews Bros., Onychuk	G 20.00
W.C. Board, assessment	G 52.85
Postmaster, stamps	G 25.00
J. Bawden, F. and M.	G 4.60
A. Bradley, F. and M.	G 7.40
P. Kosterev, re Bereza	G 2.00

Cr. Bawden that the meeting adjourn to Monday, August 10, 1936, C.U.

—B. H. Green, Sec.-Treas.,
M. D. Kinsella, Alberta.

United Church Notes

Seven Irma boys attended the recent camp at Camp Lake. Five Trail Rangers and two Explorers. There were 43 boys present altogether, and the Irma group acquitted themselves well, as three of them were chosen as tribe leaders, Clarence Carter, Arthur Knudson and Bob Charter. At the close of the camp Art Knudson was voted to the honorable position of best camper, and he also proved himself to be the champion swimmer. Clarence Carter came in first in several of the sports events. Camp life is somewhat strenuous but it was evident that the boys thoroughly enjoyed themselves, and happy memories of friends and frolics will remain with them for many a day, while the fellowship around the camp fire and the vesper period of worship will have a lasting effect upon many a life.

The pastor will be away on vacation for the next two Sundays, July 26 and August 2. Arrangements are being made for services to be held in the Irma church as usual, and it is expected they will be conducted by two young men who are well known to many in the neighborhood, Mr. Davis and Mr. Turnbull, and it is hoped that there will be a good congregation to hear their Gospel message. These notes are being written on Monday morning and nothing has yet been arranged for the country points, but a later note will be added or word sent round if services are to be held. In any case, Sunday school will be held as usual at the Paschen-dale, Albert and Alma Mater appointments. The pastor will return in time to take the regular services at Paschen-dale, Crescent Hill and Irma on August 9th.

BOYS ENJOYING CAMP LIFE AT CAMP LAKE THIS WEEK

(Too late for last week)
The boys are having ideal weather and are enjoying themselves. This year there are 47 boys and leaders. The largest group this year comes from Holden, though Irma, Round Hill and Viking are well represented. Bob McLaren, who has charge of the program, is a busy man. And where the car-loads of food Dr. Scott brings to camp go nobody knows. The cooks are kept busy. Mr. Kemp of Irma and Mr. Bell of Holden and Stuart Purvis of Viking have all had a part in the program.
The girls' camp begins on Thursday with Miss Phyllis Collier as director. (From the Viking News)

If you have a measure for the people of this and adjoining districts, an advertisement in this paper will do the work for you.

NEWS ITEMS FROM JAROW

Ludwig and Mary Jacowich are spending a few weeks visiting Gordon and Margaret Williams in Jasper Park.

Mr. Louis Treichel is building a new barn large enough for all his stock to be under shelter during the winter months. Mr. Joe Petsman is assisting in the work.

Mr. and Mrs. Tony Berenzanski and their little son Albert are spending their vacation in Winnipeg.

Mr. Harold Coe is home, unemployed, owing to the fact that the Johnson farm north of Kinsella where he was working, has been completely hailed out.

The people of Jarow are busy picking Saskatoon berries. One person remarked, "We shall have berries at least to eat next winter."

The Jarow Ladies' Aid have been invited to be the guests of the Melbrae Ladies' Aid on July 30th. Both organizations will be entertained at the home of Mrs. Arthur Routledge, which is one of the most beautiful homes in the community.

Mr. and Mrs. John Waite arrived safely home after a six weeks' trip by auto to Manitoba points.

Several of the Jarow people visited the fair at Edmonton last week.

Mrs. David and Mrs. Harold Whiddon motored to Vermilion to attend lectures delivered at the college of agriculture. These annual lectures should be a great benefit to our farm women.

Mrs. Mary Lind of Turney Valley with her two children is spending the summer with her parents, Mr. and Mrs. W. S. Jamieson.

The Board of Trade and Community Club met this week and have decided to fix the hall which will be in a proper condition hereafter to hold public gatherings, even in the severe winter weather. The lumber has been bought from Mr. E. Williams, of Kinsella.

Mr. John Skogholm is busy fixing the buildings he bought from the elevator company. Whether he is going to use them as a residence, an ice cream parlor, or a store in place of the building left vacant by the Irma Trading Co., remains to be seen.

A nephew of Mrs. A. McGregor and his wife from Ontario are visiting at the McGregor farm home.

Mr. R. Lynde, a farmer north of Jarow, having a runaway was thrown out of his buggy last Saturday. It is reported that he received a bad cut in his head. Dr. Greenberg of Irma was called to the home of the unfortunate man to administer medical help.

The great cry in our district is for rain. It is marvelous how the grain stands up under the fears of the heat of the sun. The problem of feed for the winter will be difficult to solve unless rain comes soon.

Fire Wrecks \$25,000 Damage at Sedgewick

Sedgewick, July 13.—Fire played havoc with the west side of centre Main street at Sedgewick on Monday night, the 13th, when the business places of W. J. Cumberland and J. Bay were totally destroyed with their contents, and several other business premises were damaged by fire, smoke, water and chemicals.

The loss falls heaviest on Mr. J. Bay, whose general store of dry goods and groceries had no insurance, except on the building, while Mr. Cumberland's building and stock were covered by insurance. The equipment in the shoe shop of Mr. Cumberland's building, owned by Joe Schewertzer, was also insured.

NOTES OF INTEREST OF BUSY KINSELLA

A quiet wedding took place at the home of Mr. and Mrs. W. W. Kerns on Friday, the 17th, at 4 o'clock when Christie May, only daughter of Mr. and Mrs. R. Kerns of Acme, Alta., was united in marriage to Mr. Dan Garvie, son of Mr. and Mrs. Wm. Garvie, of Kinsella. The Rev. R. Griffith officiated. Only the families were present.

The bride and groom are both well known in the community, the bride having taught at Diamond Willow school for the past five years, and the groom has grown to manhood in the district. They have taken up residence on their farm where they will be at home to their friends after this week.

This community joins in extending best wishes to the young couple in their married life.

Mr. and Mrs. Alf. Burch of Sedgewick spent Sunday at the home of Mr. and Mrs. Arkenstall.

Mrs. Viny Murray and Miss Violet Williams were visitors at the Fair on Thursday and Friday.

Mr. and Mrs. W. Revel spent most of last week in the city where they attended the exhibition, and Mr. Revel attended the Veterans' meeting. Mr. Corbett was also in attendance.

Mrs. J. Neal is spending this week with her parents at Vermilion, also taking in the fair.

Mr. and Mrs. P. J. Wangness and children spent Wednesday and Thursday at the Edmonton fair.

Miss Ida Arkenstall returned home Sunday after a fortnight's holiday at Sedgewick.

We are glad to report that none of last week's hail storms hit this district. Diamond Willow area was hit badly twice.

Mrs. C. F. Arkenstall visited in the city a few days last week and reports Stewart as improving all the time.

Mr. and Mrs. O. Watson and daughters Marion and Edith were seeing the sights at the fair last Friday.

Mrs. J. L. Smith came home from the hospital on Thursday and is recovering nicely from her operation.

Miss Dorothy Williams is holidaying at Banff this week.

Mr. Robert Witton is on his holiday to the city and other points.

Mr. Tom Skare was in the city last week.

IN JULY

I'm thankful for the twilight, for it cools the heat away;
I'm thankful for the foliage that shades me thru the day;

I'm thankful for the sunset with each glorious, lighted ray.
I'm thankful for the sunrise every fresh and sweet new morn;

I'm thankful for the flowers that the woodland aisles adorn;
I'm thankful for the inner light that holds my faith new born.

I'm thankful for the loving friends and kindly deeds so fair
That sweeten all my seasons, whether here or whether there.

And fill with luminous glow of hope what else were empty air,
I'm thankful for all blessings; as to sorrows that have crushed

My stricken heart with agony as on me they have rushed—
Perhaps enduring them has blessed me, too, for deeper gashed

My sense of the Eternal—aye, of rich Infinite
When, rising from my bed of pain, again upright I stood,

With visions rife of spheres of light above earth's attitude.
Irma, Alta. Nancy Orpha Parke.

CROP REPORT INDICATES DROUTH CONDITIONS PREVAIL IN PROVINCE

Issued by Alberta Department of Agriculture, Edmonton, July 17

Extreme drought conditions have continued during the past two weeks in southern and east-central areas, with the result that in the eastern portions of these districts particularly, hope for a harvest of any consequence has been abandoned. That part of the province from the Taber-Medicine Hat line north through the Berry Creek area to Provost, has suffered most intensely, and an almost complete crop failure is accepted by the major portion of this section. Pastures and forage crops in these districts are burned up and shortage of feed is a cause of immediate concern. It is still hoped, with the advent of rain, that a portion of the grain crop may yet be salvaged as feed, but the feed situation in any case is likely to be quite serious.

In the more westerly districts from the U. S. boundary north through the Calgary area, the hot dry weather has also taken a heavy toll, but with rain at an early date fair crops may yet be harvested in some sections.

In the west-central districts and extending for a distance north of Edmonton, only a few light scattered showers have fallen in the last fortnight. Crops, though as a whole not yet suffering excessively, have utilized all reserve moisture and are heading out short. Yields will be much reduced unless there are general rains at an early date. The continued dry weather is especially hard on the later sown grains, and the hay crop is considerably below average. To the west of Edmonton and to the east, showers have been more general and crops continue to develop very favorably.

In all sections of the Peace River country, there has been plenty of rain and conditions generally are excellent—An exceptionally good crop is in prospect throughout this territory.

Some hail has occurred at points in the central and northern districts, but damage in most cases has not been heavy and is confined to a few small patches.

A vigorous campaign continues to be waged against the grasshopper menace, which is well under control. No very great danger from grasshoppers is reported from any of the south and eastern districts, where drought conditions are now the problem of major concern.

Live stock on the whole is in good condition, though feed scarcity in the dry areas is likely to be felt before long. There is little change in the cattle market. Movement of cattle from the dry areas has commenced and shipment of hogs is fairly strong. Sow holdings in central and northern districts are definitely on the increase in anticipation of improved feed conditions. Dairy production has fallen off in the south owing to dry weather, but continues steady elsewhere with cream prices a little stronger.

Estimate of the United States Wheat Crop

On Friday, July 10th, the United States Department of Agriculture released its estimate of the probable wheat production in that country, based on conditions as existing on 1st July. The total crop was estimated at 638,399,000 bushels, an increase of nearly 15,000,000 bushels over the harvest of 1935. The winter wheat crop was estimated at 512,085,000 bushels, compared with the June 1st figure of 481,870,000 bushels. The spring wheat crop was estimated at 126,314,000 bushels compared with 159,241,000 bushels harvested in 1935 and an average harvest of 241,312,000 bushels during the 1928-32 period. On June 1st the estimate for spring wheat was 200,000,000 bushels.

The intense heat and drought occurring during the first eleven days of July undoubtedly did further considerable damage to the spring wheat crop but rainfall over the past week-end afforded some help. The most of it was advanced beyond recovery to any great extent.

Adding the carryover of 125,000,000 bushels to the current crop would provide a grand total of approximately 763,399,000 bushels. The average annual domestic consumption is a-

round 640,000,000 bushels so the U.S. has sufficient wheat for her own people. However, the location of the wheat surplus makes distribution an economic problem. Millers in many locations will find it cheaper to buy Canadian wheat while the United States may be at the same time exporting supplies abroad. The Pacific north-west, for instance, may find it cheaper to export its surplus than to ship it to the eastern States.

The purchase of Canadian wheat by the United States millers for domestic consumption and milling and bond has reached more than 45,000,000 bushels for the current crop year as compared with 25,000,000 bushels last year. Very likely similar extensive importations of Canadian wheat will be made by the United States during the coming crop year.

SPORTS

Shooting bullets at a bull's eye seems to be a growing sport in Canada and elsewhere. The Canadian team at Bisle, England, made some remarkable scores. One Canadian, J. W. A. Sharpe, of Montreal, won the Alexandra challenge cup with a perfect score of 50. Next month the big meet is held at Ottawa when sharpshooters from all over the dominion will gather to cap the top honors.

A lot of people in Canada who don't shoot will await the outcome of the governor-general's match with eager anticipation because they have bought associate memberships in the dominion rifle association. Your temporary sport scribe got quite a thrill four years ago when he held the lucky ticket. Here's wishing everybody luck, including yours truly.

Luis Angel Firpo erstwhile "Wild Bull of the Pampas" saw his hopes of a fistic comeback shattered when he took a wallop from a young Chilean heavyweight on July 14th. Firpo knocked Dempsey out of the ropes in a fight at New York some years ago. Dempsey crawled back into the ring and knocked Firpo out for keeps.

Hunting sea serpents should come under the heading of real sport. At least it must be great sport to see one of these sea monsters at play. Nova Scotia is the latest province to claim one of these big wigglers as their own. What has become of the Okanagan Ogopogos or the Vancouver Cadobasaurus? Can't the Jubilee committee scare one up as an attraction?

While browsing around for something to see at Edmonton last week your sport dopter had a looksee at the Joe Louis-Schmeling fight pictures. The report that the Brown Bomber from Detroit was doped gives us one big laugh. He may have been doped alright, but it came from the rights to the jaw from Schmeling's well-oiled fist. When Schmeling collided with the Bomber's jaw it was no dud. You could hear it smack with lots of authority. From the fourth round to the twelfth Schmeling had the Indian sign on Joe. We can't see how those smart sport scribes down east didn't pick the German to win. Louis didn't show up like the toponother he is supposed to be. Ring fans should see these pictures when they get the chance.

Loans For Agriculture

Appropriate was the warning issued recently to investment companies and investors by S. P. Grosch, K.C., chairman of the Local Government Board of Saskatchewan when he told the Investment Dealers' Association of Canada in session at Jasper, Alberta, that they could not expect to be collectors alone, but must be prepared to continue to loan money.

At the same time, according to press reports of the convention, Mr. Grosch told the bond dealers that they "must be quick to offer concessions and help in debt adjustment if investors are to retain their status and the protection they now have."

It is generally well known that many of the loan companies, if not all of them, have shut down on loans in the prairie provinces and particularly in this attitude applicable to loans to farmers. Where the security is ample and prospects of repayment on maturing dates exceptionally good the mortgage companies are accepting a limited number of "risks" in the cities, but little if any loan money is available to western farmers just now, no matter what their record, how good the security they have to offer or how excellent the character of the prospective borrower.

Thus the farmer and the agricultural industry generally in the west is in somewhat parlous condition when it comes to securing credit to make needed improvements or to carry on operations. It is true that there are governmental boards in existence for the purpose of making agricultural loans but these institutions have either no money available or such a small amount in comparison with the needs of the day that they are obliged to restrict their activities to a few select loans.

In the very few instances where mortgage corporations are prepared to advance money they are still insisting on a return of seven per cent. for their investment and this is a higher rate of interest than borrowers can afford to pay in the light of income from ordinary revenue sources.

It is admitted, of course, that there are two sides to this story as with most stories. Loan company managers say that as custodians of private funds they cannot afford to loan money in the prairie provinces at the present time and particularly they cannot afford to run the risks of making loans to agriculturists. They point to the past few years of combined general economic and agricultural depression, the latter resulting from drought, surplus stocks of wheat and low prices for agricultural products as an excellent reason why they should keep their purse strings tightly drawn when the farmer asks for a loan.

But more particularly do they inveigh against what they regard as repressive legislation enacted by the several provincial governments as a potent reason for withholding credit from the farmers, legislation which has been placed on the statute books in the belief of the sponsors that they are protecting debtors at a time when they knew not which way to turn to escape from almost intolerable burdens.

Possibly the loan companies themselves are not altogether without blame for this class of legislation in at least some instances, if Mr. Grosch's diagnosis of the cause of it is correct, for he is reported to have declared his belief that "one of the chief reasons for placing upon the statute books legislation which limits the rights of loan companies is to be found in the fact that some companies have adopted an attitude of drift and desire to wait until something turns up, with the result that the debtor gets in touch with a member of the legislature and demands all sorts of drastic legislation against loan companies."

One cannot get away from the fact that in the past four or five years, because of depression, conditions and lack of credit, farm property has perforce been allowed to run down at heels, due to the impossibility of renewing or replacing worn out equipment in anything like the degree necessary to continue to operate on an economic scale or to provide new implements to meet changed methods necessitated by changing conditions.

Almost every farmer knows by experience that this is the case and if he is unable to secure the necessary credit to enable him to replace the worn out tools of his trade and to purchase new equipment necessary for economic operation, the day when he is going to be able to pay his past indebtedness is further deferred and the loan company and the farmer alike suffer as a result.

Since the entire western country is still largely dependent upon agriculture for its future as well as its present welfare, it would appear to be good business for the loan companies to offer concessions in the matter of debt adjustment to a feasible limit and continue to loan money at a reasonable rate for agricultural purposes where the security is satisfactory. Such a course would appear to be in their own interests, in the interests of the clients whom they represent, in the interests of the farmers and in the interests of the country to do so.

Paid While It Lasted

"Washing" canceled documentary stamps, worth from \$1 to \$20 apiece, and selling them again at full value to unsuspecting commercial houses, was a racket uncovered by Secret Service men in Boston. Stamp-collectors sold the stamps to the "washers," who were accused of doing the Government out of \$500,000 on stamps used for deeds and stock transfers.

The early Indians of North America made beads from the shells of clams, fresh-water mussels, and abalone, and used the beads as a medium of exchange. It was called "wampum."

Used Diplomacy

"Dearest," said the young mother, "I've decided to name our baby Samantha." Disagreeing with her on the choice, her husband tried to solve the situation diplomatically. Finally, he said: "After all, that will make a fine name, dear. My first sweetheart's name was Samantha. I'm sure she'll feel complimented." The baby was named Janet.

Junior: "What are distant relatives?" Father: "They're the kind of people who call on you after making a long trip, and wish to avoid paying hotel bills."

Park System In B.C.

Acres Of Show Gardens Being Planned For Province

Six million acres of show gardens are being planned for British Columbia, Provincial and federal ministers are putting their legislative heads together to push immediate development of scenic parks in the coast province. Some are already well finished; others still a pencilled outline on the map.

Out of \$2,000,000 expected to go into public works this season, a sizeable lump will be used in grooming parks and building roads to make them easily accessible. The province, however, would hand over to the Dominion parks on which development has already started and concentrate upon new ventures, including the 3,000,000-acre tract named for Canada's governor-general.

At present the province looks after five of its parks and has mapped out four more for development. The Dominion has four more, completing a system that provides six acres of parkland for every inhabitant of British Columbia and more than half an acre for every person in the Dominion.

The 973 square miles of Garibaldi Park will be brought closer to trunk highways with completion of a \$6,000,000 suspension bridge spanning Burrard Inlet and joining Vancouver with its northern suburb. Preliminary work on the giant bridge already has begun.

Up until now Garibaldi Park, cradled in the coast range, has been inaccessible to motorists. Game abounds in the timbered reaches, in the Alpine lakes and on the slopes of one of the volcanic mountains that rises to a height of 9,000 feet.

The province is keeping Tweedsmuir Park for its own. This, a vast garden that covers 3,000,000 acres of rivers, mountains and lakes, is largest of all. At present the untended acres are threaded out by trails. Development of roads will be considered under a public works plan carried out by provincial and federal governments.

Maple Syrup Crop

Quebec Produced Largest Quantity This Year Since 1932

One of this French-Canadian province's foremost industries, the maple crop, this year reached the bumper proportions of 1,581,600 gallons of syrup and 5,747,900 pounds of sugar, a major portion of which was shipped to the United States. The largest crop since 1932, the maple sap produced a revenue of \$2,267,300, as against \$1,911,000 in 1934.

More than 40 per cent. of Quebec's maple sugar crop is annually bought by cigarette manufacturers in the United States, and 11 countries, French chemists are said to be experimenting on the possibility of using maple sap in the production of alcohol.

Roquefort Cheese

More Than 26,000,000 Pounds Are Manufactured Annually

More than 26,000,000 pounds of Roquefort cheese are manufactured annually in the picturesque French village. For more than 11 centuries this cheese has been manufactured on a commercial basis, but Roquefort cheese, itself, goes back even farther in history, as it is mentioned by Pliny the Elder, who wrote in the early decades of the Christian era.

More than 200,000 persons, working on 25,000 farms, are employed and earn their living directly from the cheese industry. Milk is contributed by 700,000 sheep, tended by 10,000 shepherds.

Preferred More Dignity

Servants Of English Earl Did Not Like His Democracy

Many years ago we used to correspond with Auberon Herbert, the son of the fourth Earl of Carnarvon, who, although a vigorous opponent of socialism, was one of the most democratic of aristocrats. He was so democratic that he insisted on his servants sitting at table with him and his wife. His servants disliked his democracy so much that at the end of a week they gave him notice that they were going to quit.—The Argonaut.

Trying New Method

On three farms in Oxford county, Ontario, an experiment is in progress with a new method of preserving alfalfa. The crop is stored in the silo in green condition and treated with acid.

England has two of the fastest battle cruisers in the world, the Repulse and the Renown, each having a speed of more than 31.5 knots.

Clever Men Beat Bank

Worked New System But Were Subsequently Caught

This stunt was revealed by an official of an important bank, victimized by the perpetrators, who since have been arrested. . . Two partners, ostensibly operating a legitimate business, opened a check account and deposited \$10,000. Within three months they had increased the fund to \$32,000, making the deposits in person, and getting to know the bank tellers. . . One partner then appeared, asking to cash a partnership check in the sum of \$29,458.27. The teller recognized the signature, okayed it, and then—as is customary—used the teller's autograph to ascertain whether a sufficient balance was on hand.

Simultaneously, the other partner appeared at another teller's window, asking to cash a \$29,458.27 check. This teller also used the teller's autograph, and the official upstairs wrote in reply: "Okay, okay. I told you it's okay." The loss was more than \$27,000.—New York Post.

Eliminates Fire Hazard

Automatic Extinguisher For Airplanes Has Been Perfected

Fire is to be banished from aviation, according to British scientists who have been working for a long time on a new blaze-prevention system for airplanes. Reports received in London say an automatic fire-extinguishing arrangement has been perfected which makes it almost impossible for a machine to catch fire, either in the air or after impact with the ground. Extinguishers are fixed in vital parts, on the gasoline tanks, with jets leading to the gasoline pipes, over the engines, in the passenger cabins, spring-operated automatic nozzles, and on the fuelage. They have spring-operated automatic nozzles which act if a bump exceeds the pressure at which the spring is set. Extinguishing liquid is sprayed even before fire can start and no flames can survive the action of this liquid.

Hypnotic Suggestion

Lecturer Claims It Is Wonderful Help In Dentistry

Students of the Royal Dental Hospital in London have had their teeth cracked, chipped, filled and extracted, all without anaesthetics—and all without pain. It's done by hypnotic suggestion.

"There is nothing mysterious about it," claims William Lovatt, who is lecturing on "hypnotic dentistry" in several large London hospitals, "it is a perfectly natural process and in no way harmful."

A suggestible patient—and 70 per cent. are—has only to accept suggestions for anaesthesia and he can submit to the forceps or drill confident that he will feel nothing, either at the time or afterwards. . . Experience with 3,000 cases, he says, has convinced Mr. Lovatt that the possibilities for hypnotism in modern medicine are enormous.

Lifted Tons Of Money

W. T. Dagger, of Blackpool, England, just retired from the Corporation service, has lifted over 300 tons of money in his 30 years of collecting from penny-in-the-slot meters. His collection, he estimates, has averaged \$80 daily in coppers, or about \$675,000 in 30 years. As \$5 in copper weighs just over five pounds his aggregate collection totals 302 tons.

Snowshoes For Quilts

The Dionne quintuplets will be able to waddle around in the snow next winter without sinking if Mike Lyons, of Clayville, New York, has anything to say about it, for he has constructed five pairs of snowshoes for the girls from Callander.

The hardest thing in making a speech is to know what to do with your hands.

AFTER EVERY MEAL

Using New Ceremony

Dominions To Have Special Part In King's Coronation

The British Dominions will have a special part in the crowning of the King, a cable to the New York Times from London, said. It adds that following the coronation next May, King Edward VIII, will make a tour of the Dominions.

"When Edward is crowned in Westminster Abbey on May 12, 1937," it says, "Canada, Australia, South Africa and New Zealand will receive positions in the ceremonies emphasizing their new importance as self-governing nations under the Statute of Westminster, enacted since the last coronation."

"In accordance with this statute, the King becomes not only ruler of the British Empire as a whole, but separately and distinctly King of the Dominions. A new ceremony will be prepared stressing this conception of the King as the direct head of each Dominion. Through the Dominions Office conversations have reached an advanced stage regarding the exact part the Dominions will play. The crowning of the King in this new form will be the prelude to a royal tour of the Dominions."

SELECTED RECIPES

ROLLED NUT WAFERS

1/2 cup "Crown Brand" corn syrup
1/2 cup butter
1 cup bread flour
3/4 cup sugar

1 cup chopped walnuts or peanuts
Heat the "Crown Brand" corn syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the flour which has been mixed and sifted with the sugar. Now add the chopped nuts. Drop small portions from the tip of a spoon on a greased cookie sheet, 2 inches apart. Bake in a slow oven. These cookies can be rolled or just left plain.

Gliding In Stratosphere

May Be Possible According To Tests Made In Moscow

Gliders may be able to reach the stratosphere ere long, according to reports from Moscow. By a new method, a glider may be towed to a great altitude, the towing wire then paid out until the glider is 6,500 feet above the towing plane. If a second glider is towed by the first and its line paid out it can ascend above the first. Thus a plane flying below the stratosphere can, by this flying "chain," tow a glider higher above it. Gliding Master Venslav has been making the tests.

Faster Speaking

It is interesting to have the testimony of George Emery (who has written 150,000,000 words in shorthand) to the fact that people speak much faster than they did; the average increase he estimates at something like 25 per cent. The coming of the motor-car seems to have affected the national rhythm. Even much of the music we hear is taken considerably faster than the composer intended.—London Observer.

Not until 1870 were milk cows known in Japan. An American cow was imported at that time and two men, selected for their strength, were assigned the task of wrestling the milk from her.

Working On Anti-Fog Ray

Marconi Is Busy Trying To Perfect New Invention

Were Charles Darwin alive, he would not agree with the dissipation of the dank vapor which assails Great Britain mainly during cold weather, for the famous naturalist's delight of London was founded in a fog.

He gloried in its "grandeur," as he said, and always looked forward to wintering in the metropolis, attracted by the prospect of a smoky mist. Although the origin of the species of town fog is the deadly smoke, harbinger of ill health, the Victorians suffered these visitations with no hope of a "cure"; but today scientists are having promising results.

Recently there have been many attempts to find the best method, and the outcome seems to be that future research will be centred around the aeroplane. The basis of experiments has been to spray chemicals down on the fog, and the mist will vanish if sufficient anti-fog mixture is used. Already headway has been made, but the drawbacks at present are the cost and lack of facilities, for a huge fleet of planes would be necessary to remove a yellow "peasoupier."

The most recent anti-fog developments promise to end all this fog, however; in the midst of "war-ray" talk and the "mystery beam," which detects enemy ships and hostile aircraft fifty miles away, comes the report that Marconi's Marconi is perfecting a great anti-fog ray.

When, or whether, this ray will mature cannot be said; but it would appear that a definite fog-dispelling invention of wide application will be available. It may be a ray, a powder, or chemicals. Everything depends upon the scientists.

Forgotten Eskimo

Scientists Will Search For Traces Of Civilization In Eastern Arctic

Traces of a forgotten Eskimo civilization in the eastern Arctic will be sought by a Dominion government scientists who left for the north on the Naropac, sailing from Montreal.

It is the annual patrol to government posts in the north with the holds of the veteran Arctic ship bulging with mail and supplies. In a 10,000-mile cruise that will take the ship within 800 miles of the North Pole, contact will be made with 35 posts.

Included among the passengers was Douglas Leechman, an anthropologist from the National museum, who will spend several weeks on the Eubon islands, lying at the eastern tip of the Ungava peninsula.

In the far-eastern Arctic, tools of bone and ivory have been unearthed that bore no resemblance to those used by Eskimos in other sections of the north. Scientists believe they indicate a peculiar Eskimo civilization now extinct, which Leechman will try to trace. He will probe old village sites on the islands in the hope of finding some clue to the date and character of the ancient culture.

By improved technique, surgeons report that it is now possible to cut and lengthen bones so as to extend a shortened leg as much as five inches.

No enemies to forgive? Then pardon a few friends.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the blood and you feel sour, sick and the world looks pink.

A new bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! It's absolutely safe and sure. See.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA CRAIG

CHAPTER I.—Continued

Starr did not realize that her tempestuous words had been spoken aloud until the man's voice interrupted. It was a crisp, pleasant voice, with a lazy, amused drawl. She whirled around to face him, hands gripping her handbag tightly as the nearest support.

The man had detached himself from the careless crowd, and stood not far from her elbow, indolently leaning against a corner of the show window frame. He was looking down on her with quizzical gray eyes that held a glint of humor in their depths. For that first startled moment Starr's complete vision was filled with him. He was tall, handsome in a bronzed, broad-shouldered, slim-waisted way, with a physique that bespoke the owner's pride of its possession in its care. He wore dark, smartly tailored clothes which were unerringly placed in their category of good taste. Money, too, of course. That he was accustomed to that as to the air he breathed was in his slightly arrogant features, features which had just the proper thing of hardness to give him an air of interesting masterfulness.

The smile of tolerant—or was it condescending?—amusement curved his lips more widely as he looked straight into Starr Ellison's upturned face, from which the eagerness of her passionate plea had not fled.

"So you want to play, do you?" he repeated, with maddeningly slow emphasis.

Starr could not understand why on the instant she was not annoyed at his intrusion, or his very apparent jibing. Such a short time ago

the Starr Ellison, she had always known would have thought furiously: "Masher!" and one look would have been a crushing rebuff to him.

Today it did not matter. Such things were of no small account. Nothing mattered, anyway. Everything was an affair of relativity. Things were important only because of the bearing they had on your future. With barely six months to live, which could be considered practically no future at all, what did it matter what she might say or do? What anyone else in the world might say or do?

Even though she was surprised at herself, steadily Starr returned the contemplative scrutiny of the gray eyes that were amusingly regarding her. She placed him. Readily. The man before her represented that gay, smart world she had never known, for which she had yearned—the other half of the world which knew how to play. He had taken advantage of the opportunity. He stood for all she had lost in life and could never hope to attain.

She cried out at him suddenly, her eyes blazing at him as though she were, through him, hurling her defy to earth and heavens:

"Yes, if you must have it! More than anything else in this wide, wide world, I want to play!"

The smile in his eyes was, tauntingly on his lips, as he drawled:

"That, I should imagine, should be something not too hard to arrange—"

But, aghast at herself, Starr was backing away, long lashes dropped over her confused eyes. What, had she done? Unnoticed, she backed into a passerbey. The gray-eyed man's hand went out to touch her arm.

"Wait a minute," he said. "We ought to talk this over a bit, hadn't we? There's no hurry." His smile was friendly. "The Arabs, you know, have a saying: 'What is there to hurry for?' We are all going the same way. Why should we try to pass one another? Let us enjoy today, for today will never come again." Of course this isn't Egypt, but—

He stopped short at the look of blazing fury in the depths of the girl's dark, mysterious eyes. Her voice was a flame at him.

"I hate Egypt!"

Then she was gone, flying up the avenue, losing herself in the crowd, never looking back. Michael Fairbourne stood staring after her. Then he grinned and shrugged as he lit a cigarette and moved carelessly along the street.

"Seem to have dubbed my shot again, eh?" he murmured. Then he glanced along the street as if again seeing the black-eyed girl with the camel's skin. "Still, I'm wondering a little—"

CHAPTER II.

There was no good reason for Starr Ellison to be on Fifth Avenue that cheerful early Autumn mid-day. Only that it was not Sixth Avenue. Nor was there along it any employment offices, wordlessly insisting on her need for job hunting in the sordidness.

After her visit to the doctor, with whose smiling assistant she had, incidentally, left the greater part of her small remaining store of cash—for the privilege of being told she had only six months more of life—such small and distasteful matters as searching for a job appeared of small moment. Especially when there were no jobs. Why keep on hunting for one by which she could merely keep the breath of life in her body for six months more? It hardly seemed worth while.

Such thoughts were in Starr's mind as she fled along the street after her tempestuously uttered rebellion against Fate in the atmosphere of the prosperous Avenue. Nevertheless, she mechanically turned at the next corner and sought the street made clamorous by the E overhead, and headed for the agencies which were on her list and not already tried that day. She couldn't be a quitter entirely, she supposed, even if she had so short a time to fight. Work was most necessary at the moment. Vitally so, for she had a most distasteful memory of her seance that morning with the keeper of her rooming house. A dreary, hopeless kind of place it was, but Mrs. Maloney who kept it, had made it quite plain to Miss Ellison that she had waited for her rent quite long enough, and that while she was right sorry that Miss Ellison couldn't get a job, there were plenty of other people in the same fix. After all, Mrs. Maloney's was not an eleemosynary institution. In other words, Mrs. Maloney had conveyed to Starr that if she was prepared to pay her three weeks' arrears of rent that she could have her clothes. Otherwise—

None too pleasant a prospect, and it was beginning to look like a rough ride ahead for a girl who, at most, had in her purse only enough for lodging for a night or two some-

where—without baggage. Even if she were going to pass out in six months, in the meantime, she supposed, she would have to sleep somewhere.

A wry smile crossed Starr Ellison's lips as she rushed along. She—she—who didn't know where she was going to sleep that night, had been wasting her time on Fifth Avenue, rebelling against not having a taste of life. She had been wanting to play!

She didn't know that noon had come, and forgot that her breakfast had been a doughnut and a cup of coffee until she suddenly realized that the crowds who were jostling her, elbowing her, were making their way into the rows of eating places that sat cheek by jowl along the cross street. She stopped still before one of them, drawn irresistibly by the sight of the good things to eat temptingly displayed. Another show window!

She forgot that she was hurrying to look for a job, forgot that she wanted to play, forgot even for that minute what that doctor had told her, as her eyes widened at sight of the food, and then swept on further to the people at the tables. In her eyes was an expression of looking upon some amazingly absorbing scene, but it was no more upon which she gazed than the vista of food and warmth that spread out in one of those restaurants which not so long ago Starr Ellison would not have bothered to give a passing glance.

Two prosperous looking business girls were having their luncheon near the window—a substantial meal, with a steak that was simply oozing buttery gravy, new peas and the crispest looking salad.

Likes Canadian Kitchens

England Behind In That Respect States Woman From Wales

Kitchens of Canada and the United States had been a revelation to many countrywomen from across the seas, Mrs. Frank Gresham, of Wales, a delegate to the recent convention in Washington of the Associated Country Women of the World, commented as she passed through Montreal en route for her home.

Mrs. Gresham said that in English kitchens old pans and old ways were too prevalent, while kitchen planning was still too much "an idea only." "It is nonsense to say we have nothing to learn from other countries," she remarked.

Bamboo Tree Grown In B.C.

Beaulieu, British Columbia horticulturist, is creating a tropical paradise. Seeking to prove that his theory that bamboo trees can grow in Canada, Keys completely surrounded his home with a half-acre varieties of the tropical trees. The trees were flourishing.

ITCHING

ITCHING STOPPED in one minute! For quick relief from the itching of pimples, blotches, eczema, athlete's foot, rashes and other skin eruptions, use the famous "D.D.D. Prescription" antiseptic liquid D.D.D. Prescription. It cures skin itching in minutes. A. A. trial bottle proves it—no money back. Recommended at drug stores for forty years. Ask for D.D.D. Prescription.

The Big Nickel

Looms Large On The Collection Plate, And Is As Common As Sin

"One of the hardest things the church has to face is the big silver nickel," Rt. Rev. John Lyons, lord bishop of Ontario, said at the unveiling of a tablet in St. James Memorial hall at Joyceville, near Kingston, Ont.

"The big nickel is as widespread and as common as sin itself," he said. "It is often a matter of wonder to me how people manage to collect so many. People contribute adequately without complaint to amusement. Probably if these people fully realized the problems of the church, they would be of greater assistance."

Native Shrubbery

The scarlet fruit of the silver buffalo-berry tree imparts a gay touch to the prairie farms where the tree is used in the surrounding shrubbery. It is a native of the prairies and is found in hills and along streams from the Pembina mountains in Manitoba to the Bow river in the Rocky Mountains. In the Manitoba hills the tree grows to a height of 18 feet. It is generally armed with thorns.

Removing Old Arch

The Arch of Triumph, built by Alexander I. to celebrate Napoleon's retreat from Moscow, is to be razed to make way for traffic. The arch, more than 100 years old, stands on Gorky street, near the White Russian Railway Station, point of arrival and departure of tourist trains.

Horseback Trail

Will Be 2,300 Miles Long, Extending From Canada To Mexico

Plans for a horseback Pacific coast trail, extending from Canada to Mexico, have been announced by the National Park Service. It will be 2,300 miles in length and will be continuous on all the higher mountain trails on the coast. It also will connect all intervening national parks.

Nearly all of the work is to be done by the CCC and the trail is expected to be completed this year. Metal signs will mark the entire route for the benefit of horseback riders or hikers.

"I know an artist who painted a cobweb so real that a maid spent an hour trying to get it down."

"Sorry, but I don't believe you."

"Why not?" Artists have been known to have done such things.

"Yes, but not mads."

Cut flowers last longer in water if the lower leaves are removed from the flower stem, so that they do not decay in the water.

Little Helps For This Week

That good thing which was committed to thee, keep by the Holy Ghost which dwelleth in us. 2 Timothy 1:14.

Oh! that the Comforter would come. Nor visit as a transient guest. But fix in me His constant home, And keep possession of my breast. And make my soul His loved abode, The temple of indwelling God.

The real progress of your soul in the divine life is a tender plant. It requires stillness, meekness, and the unity of the heart totally given up to the unknown workings of the Spirit of God, which will do all its work in the calm soul that has no hunger or desire but to escape out of the mire of its earthly life into a life with God. It is not wise to yield to an eagerness of many things which although they seem innocent will divide and weaken the workings of the divine life within you.

The French were the first to use airplanes extensively.

W. C. T. U. NOTES

Travellers' Aid

There is the Dept. of Travellers' Aid, functioning very efficiently in the ministrations of most humane and beneficial service that is of practical value. Infants, idiots and invalids alike are helped through railway stations, as well as clever adults. There is a systematized network of these women throughout the travelled area of the civilized world. A fresh directory is issued annually, giving all the names, addresses and locations of these women to date. A Travellers' Aid woman is stationed at all railway points in the cities and large centres. We have all seen them—wearing their badge—which insures safe guidance to all travellers who require advice, information or aid in any direction. But we do not always realize how good and effective the mission they perform. I have known helpless invalids passed from point to point in their care; at each successive change of train, the Travellers' Aid cared for them, nursing, relieving, ministering to their needs and finally having them put safely aboard the right train, which carried them to the next stop. Inexperienced children can be (and are) put in charge of these women and travel in safety any distance.

If someone is going from your town to another part of the world, no matter how remote, to a little station in Mexico, or a port in China, all that is needed to secure reliable espionage and every necessary advice or instruction on the journey is to just send a description of the party, together with statement re date and train to the different Travellers' Aid along the way (see directory), and the party will be securely cared for around the globe. Think what this means to tired mothers and to inexperienced travellers of all classes. Is it not a beautiful service?—reminiscent of One who "went about doing good."

These women are salaried largely by the cash receipts which certain companies grant the W.C.T.U. for coupons. Cash donations for this purpose are of course always acceptable; and in some instances the W.C.T.U. has added its quota to help make up these salaries. But the coupons are a big feature in this work. The companies which allow the W.C.T.U. organization cash for coupons, with the understanding it is to be applied to Travellers' Aid salaries, are: Royal Crown Soap Co., W. H. Malkin, Blue Ribbon, Standard Brands, Nabob, Gillespie Meal.

So, if you would like to help salary these women who are doing such helpful service, give your coupons from any of the above brands to the Travellers' Aid Supt. of your local union. This work also serves one useful means of preventing white slave traffic. I once heard a Travellers' Aid woman in one of our large western cities say that sometimes she would see a suave man approach some unsophisticated girl, waiting in the station, evidently uncertain where to go or what to do, apparently at a loss what move to make, in response to his offer of assistance. "But," said Miss W., "when I saunter near and he catches sight of my badge, he immediately fades away out of the picture, his manner giving unmistakable evidence that his intentions were to victimize." "And then," said our department worker, "I feel my life is worth while to somebody."

Once I came across a mentally deficient mother with two children on the train going to Edmonton—"to visit her father!" whom she told me "worked on the street." She hadn't the remotest idea what sort of labor he was doing, in what part of the city he was employed, or where he lived. She was just going, in gleeful simplicity, to visit her father in that (to her) metropolis, without the vaguest notion how to locate him, with no realization at all that she needed to know anything—and it was to be a surprise to him!

I took charge of her on the way and then, unable to do more, I turned her over to the Travellers' Aid, with the explanatory data I had been able to glean in a day's journey. Months afterward the Travellers' Aid told me it took her and civic officials three days to locate the father (at an obscure job) and in the meantime the woman who was of the gullible type easily victimized was placed in a carefully supervised boarding house and the costs paid by the organization, for the woman had but 15c!

And similar instances are multiplied a thousandfold every year. So much for one department of the W.C.T.U.

Nancy O. Parke.

TOBACCO—For \$1.50 will ship you Sample package, ten pounds of mild or strong leaf tobacco, with preparation to give good aroma to tobacco free, all for \$1.50 or 50 lb \$5. Agents wanted. The Capital Cigarette Light Co., 445 Cumberland St., Ottawa, Can. J.12-A-28

CARD OF THANKS

Mrs. Taylor and family wish to thank their many friends for the kindness, sympathy and beautiful floral tributes; Rev. Kemp for his words of comfort and the Irma choir for their inspiring music.

TENDERS WANTED

Tenders will be received by the Coal Springs School Board for the painting of Coal Springs school house. Tenders to be in the hands of the secretary not later than August 1st. Lowest or any tender not necessarily accepted.

E. R. Erickson, Secretary, Irma, Alberta.

NOTICE

To Electors of Municipal District of Kinsella, No. 424.

Mr. Jas. Stronach having resigned as Councillor for Division No. 5 of the Kinsella M. D. No. 424, a by-election will be held in this division to fill the vacancy caused by Mr. Stronach's resignation.

Nomination day is Saturday, July 25th, 1936, from 3 to 4 o'clock p.m. and will be received at Lee's Hall, Kinsella.

If an election is necessary it will be held one week later at the same place, voting from 9 a.m. to 6 p.m. BLAKE H. GREEN, Sec.-Treas., 15-22c M.D. Kinsella, No. 424.

Cash

It was very early in the history of EATON'S that the principle and practise of buying and selling for Cash only was laid down. With certain exceptions we shall mention later, this is still the EATON way of doing business.

Today we still pay cash ourselves for our purchases, because by so doing we are able to buy to the very best advantage. And we confine our selling activities largely to the same basis for exactly the same reason—because Cash Merchandising offers the customer the lowest possible pricing on whatever she buys.

On certain items of furniture, furnishings and other equipment we do, as a convenience to customers, offer the terms of the EATON Budget Plan. But the Budget Plan prices are higher than the Cash Prices. They have to be, because it does cost more to sell merchandise "On Time." The alternative of paying Cash is always offered, however—and there is always a worth-while saving when you do!

EATON'S

NOW A NEW BIGGER BAR

MORE SOAP AT NO EXTRA COST

The new Sunlight Soap is the same pure, quick-soap that has lightened the wash-day burden of millions of housewives... the only soap with a \$5,000 guarantee of purity... easy on the clothes and hands. Ask your dealer for the new, larger Sunlight bar and save money.

Now a bigger bar for a single carton. The 4 small bars in one carton will no longer be obtainable.
